

AI & BEHAVIOURAL INTERVIEWING

In the interview context, AI tools can:

- Analyze job postings
- Generate practice questions
- Evaluate your responses
- Even help you rehearse!

But AI isn't a crystal ball. It supports you—it doesn't replace your preparation or your personal judgment.

Ways AI can assist you to prepare for a Behavioural Interview:

- AI can guide you in structuring your answers using the STAR method (Situation, Task, Action, Result).
- You can share a story or bullet points, and AI can help you polish it into a clear, concise, and compelling answer.
- Generate practice questions based on the role and industry
- Help you structure STAR responses for behavioral questions
- Provide feedback on tone, clarity, and confidence
- Simulate mock interviews using AI-powered platforms

Tools You Can Try

- ChatGPT – Ask it to generate role-specific interview questions or simulate a mock interview
- Interview Warmup by Google – Practice responses and get instant feedback
- Yoodli – Provides real-time coaching on filler words, pacing, and eye contact (via video)

Sample Prompts to Use

- "Give me 5 behavioral interview questions for a Marketing Manager role."
- "Based on this job posting, what are some behavioural interview questions?" (Paste the job posting)
- "Based on this job posting (Paste the job posting), what are some behavioural interview questions and how do they align with my resume?" (Paste resume bullets)
- "Help me write a STAR response for this question: *Tell me about a time you made a mistake at work.*"
- "Here's my answer to a behavioural question—can you improve the wording and structure it using the STAR format?"
- "Can you give me behavioural interview questions for a [job title] position in [industry]?"
